

Ph.D.

Programmes in English
and Other Foreign Languages

Academic year 2021/2022

CHARLES
UNIVERSITY

Admission procedure

Choose a study programme

Visit the faculty website – www.cuni.cz/faculties

Information on specific admission requirements and application procedures.
Ph.D. applicants are strongly encouraged to contact potential supervisors ahead of time:
www.cuni.cz/phdadvisors

Application form

Online: www.cuni.cz/applicationform
Available also on the faculty website.

Recognition of previous education

Must be submitted to the faculty by the enrolment date, unless specified otherwise.

Confirmation of application

Wait for an invitation letter to the entrance exam (if applicable).

Visa for up to 90 days (if necessary)

Prospective students with visa duty are advised to apply for a short-term visa to be able to enter the Czech Republic and take the entrance exams.

Entrance exams (if applicable)

Letter of acceptance

Long-term visa or residence permit

for the purpose of studies (if needed)

Enrolment

at your faculty's Study Affairs/International Office.

Ph.D. Programmes

Doctoral studies are one of the priorities of Charles University, with the objective of training students in independent research work and providing them with the appropriate qualifications in the given academic discipline. Doctoral study programmes usually take three or four years and finish by a doctoral examination and a public defence of a doctoral (dissertation) thesis. Successful graduates of doctoral studies obtain the academic title of the Doctor of Philosophy (Ph.D.).

Applicants for postgraduate programmes are admitted based on the submission of a certificate of graduation from their Master's studies and a completion of all admission requirements. More specific entry requirements are set by the Dean of the respective faculty in accordance with the law.

Some of the Ph.D. programmes will also be open from March 2022, with the application deadline in November or December 2021. Check the faculty website for up-to-date information.

Ph.D. Programmes

These programmes are open to those who have graduated from a university or other institute of higher education with a Master's degree in Protestant Theology (or a related discipline) and thus provided evidence of their academic abilities. Applicants must also have passed examinations in at least one of the languages important for European theology, other than their mother tongue (i.e. German, English, French, Italian, or Spanish). Ph.D. programmes can be studied in either Czech or English.

Postgraduate doctoral studies consist of research activity leading towards a written dissertation, the broadening and deepening of the student's knowledge in their chosen field of study, and the mastering of the techniques of academic work. Students are also required to attend certain lectures, seminars or convocations, pass an exam in a second language, write various papers, reviews, or literature searches, pass three exams in theological disciplines and have articles published in specialist journals. The student's individual study plan is worked out together with the student's supervisor. Students who meet these requirements and successfully submit and defend a dissertation are awarded the title of Ph.D. by Charles University. The standard length of postgraduate doctoral studies is four years. The maximum duration of a study course is eight years.

Postgraduate doctoral studies (PDS) are offered in the following fields:

- **Biblical Theology**
- **Historical and Systematic Theology**
- **Philosophy of Religion**
- **Practical and Ecumenical Theology and Theological Ethics**

Application Procedure

Potential applicants should first contact the appropriate Head of Department (see the website) for the field in which they wish to write their dissertation, give details of the topic for the dissertation and the language in which they will study. The Department will then consider if there is an appropriate person available to act as a supervisor. If so, and if possible in consultation with the prospective supervisor, the applicant should submit a written application that includes the following:

- application form
- curriculum vitae, including a detailed description of theological studies undertaken so far
- certified copy of a Master's degree
- if possible, a recommendation from a previous academic supervisor or teacher
- outline of the proposed dissertation project, including the topic, field, methods and aim of research (2–3 pages)

Entrance examinations usually take place in June, consisting of an interview with members of the Faculty's Inter-Disciplinary Council for Postgraduate Studies, in which the applicant defends the outline of his or her proposed dissertation project.

Application deadline*: April 30; July 31; December 31

Annual tuition fee:** EUR 500

Hussite Theological Faculty

Ph.D. Programmes

- **Hussite Theology (4 years)**
- **Jewish Studies (4 years)**

Hussite Theology

The doctoral study programme “Theology”, the branch of study “Hussite theology”, prepares students for independent scientific research and independent creative activities in the area of theology. The branch of study enables students to specialise according to his or her individual study plan. The branch of study provides knowledge of hermeneutical approaches and applies them in the contemporary theological discourse and also in the dialogue with confessional approaches of other theological systems. The subject of the studies is a theological compendium interpreted in the course of the Hussite theology. The goal of the studies is a scientific preparation of first-rate experts that are capable of independent scientific work in the area of theology. The branch is simultaneously oriented to awareness of the fact that from the very beginning there is an effort to new understanding and new interpretation of fundamental theological notions. Thereby the branch is in context with other concepts that were overcoming a metaphysical conception of the world. It deals with the key questions of the Christian belief and Christ presence in this world. Students of the branch have got an opportunity to learn how the questions are practically manifested in current social science of the church as well.

Jewish Studies

The doctoral study programme “Theology”, the branch of study “Jewish studies”, prepares students for independent scientific research and independent creative activities in the area of Jewish studies. The branch of study enables students to specialise in their profession according to his or her individual study plan. The branch of study develops the intellectual legacy of Jewish studies and applies that in the contemporary religious situation of Judaism. The subject of the studies is Jewish history and culture, synagogue liturgy, Jewish religious philosophy, rabbi literature, reading and interpretation of selected texts of Babylonian Talmud and Hebrew language of rabbi texts. The goal of the studies is a scientific preparation of first-rate experts that are capable of independent scientific work in the area of Jewish studies. The branch is not nationally or confessionally defined but interprets Judaism as a religious phenomenon in the historical contexts overlapping into present problems. Learning about the spiritual values of Judaism enables students to deepen their understanding of Christianity, primarily its ethics.

Application deadline*: April 30 **Annual tuition fee**:** CZK 2,000

First Faculty of Medicine (Prague)

Charles University, First Faculty of Medicine

The First Faculty of Medicine in Prague implements postgraduate scientific education in cooperation with the Second Faculty of Medicine, Third Faculty of Medicine, Faculty of Medicine in Pilsen and Faculty of Science, as well as with biomedically oriented institutes of the Czech Academy of Sciences and Research Institutes of the Ministry of Health of the Czech Republic.

Ph.D. Programmes are available as either full-time or combined form of study:

- **Addiction: Specialization in Health Care**
- **Biochemistry and Pathobiochemistry**
- **Bioethics**
- **Biomedical Informatics**
- **Cell Biology and Pathology**
- **Developmental and Cell Biology**
- **Experimental Surgery**
- **History of Medicine**
- **Human Physiology and Pathophysiology**
- **Imaging Methods in Medicine**
- **Immunology**
- **Medical Biophysics**
- **Medical Psychology and Psychopathology**
- **Microbiology**
- **Molecular and Cellular Biology, Genetics and Virology**
- **Neurosciences**
- **Nutritional and Metabolic Sciences**
- **Parasitology**
- **Pharmacology and Toxicology**
- **Preventive Medicine and Epidemiology**

All information on the admission procedure for doctoral (Ph.D.) degree study programmes, forms, required documents (enclosures to the application) etc., is available on the faculty website.

How to Apply

- First, select the appropriate field from the courses offered and select and contact a supervisor.
- Submit the electronic application with all enclosures and technicalities.
- The interview shall take place during June of the same year.

Application deadline*: April 30 **Annual tuition fee**:** No tuition fee

The Second Faculty of Medicine provides doctoral studies together with the First Faculty of Medicine, the Third Faculty of Medicine, the Faculty of Science, the Faculty of Physical Education and Sports and Institutes of the Academy of Sciences of the Czech Republic oriented to biomedicine and departmental research institutes of the Ministry of Health of the Czech Republic.

The aim of studies is the preparation of the graduates of the Faculty for individual work in basic and specialised research work in medicine. The concept for study programmes and the requirements in each programme are set by the Subject Area Board, which is composed of specialists from all participating institutions. The programmes are open to university graduates from the Czech Republic and abroad. The standard period of study is four years. All study programmes are offered without specialisations.

Please note that all prospective doctoral students must first contact the relevant department in order to locate his/her supervisor.

Ph.D. Programmes are available as either full-time or combined form of study:

- Biochemistry and Pathobiochemistry
- Biomedical Informatics
- Cardiovascular Science
- Cell Biology and Pathology
- Experimental Surgery
- Human Physiology and Pathophysiology
- Imaging Methods in Medicine
- Immunology
- Kinesiology and Rehabilitation
- Medical Biophysics
- Microbiology
- Molecular and Cell Biology, Genetics and Virology
- Neurosciences
- Pharmacology and Toxicology
- Preventive Medicine and Epidemiology

Application deadline*: April 30 **Annual tuition fee**:** No tuition fee

Postgraduate doctoral studies in medicine are split between the Faculty and the faculty hospital. The Faculty offers accredited doctoral courses in a number of medical disciplines. All study programmes are of four years' duration.

Ph.D. Programmes are available as either full-time or combined form of study:

- Anatomy, Histology and Embryology
- Biochemistry and Pathobiochemistry
- Experimental Surgery
- Gynaecology and Obstetrics
- Hygiene, Preventive Medicine and Epidemiology
- Imaging Methods in Medicine
- Internal Medicine
- Medical Biology and Genetics
- Medical Pharmacology
- Medical Microbiology
- Orthopaedics
- Pathology
- Physiology and Pathophysiology
- Stomatology

Ph.D. Programmes open from March 2022:

- Anatomy, Histology and Embryology
- Experimental Surgery
- Gynaecology and Obstetrics
- Medical Biology and Genetics
- Pathology
- Physiology and Pathophysiology

Entrance Examination

The entrance examination takes the form of an interview focusing primarily on technical and language skills, as well as the readiness of candidates for independent scientific work in their chosen area of research interest.

Interviews comprise:

- specialised topic (0–40 points)
- examination in the area of interest (0–30 points)
- publications, lectures (0–10 points)
- English language (0–20 points)

Admission requirements:

- completed university Master's degree programme, not later than the date of the beginning of the academic year (October 1)
- submitting an application according to the requirements of the Charles University Faculty of Medicine in Pilsen by April 30 / November 30
- interest in work in selected subject of research and ability to perform scientific work
- passing of entrance interview with at least 70 points
- recognition of your university (Master's) diploma

Application deadline*: April 30; November 30 **Annual tuition fee**:** No tuition fee

✉ prijimacky-phd@prf.cuni.cz; paralovl@prf.cuni.cz

🌐 <https://www.prf.cuni.cz/en/phd-programme/doctoral-programme-study-theoretical-legal-sciences-law-and-legal-theory-european>

👤 Contact person: Ludmila Páralová

One branch of doctoral study in English will be opened in the academic year 2021/2022:

Theoretical Legal Sciences – Law and Legal Theory in European Context

Guarantor of the programme: prof. JUDr. Jan Kuklík DrSc., Dean of the Faculty of Law

Field specification

The aim of the study programme Theoretical Legal Sciences – Law and Legal Theory in European Context is creative research activity and education of specialists and academic operatives with a scientific approach to solving theoretical and practical problems in the field of single or multiple scientific legal subjects. Graduates of the Ph.D. study programme Theoretical Legal Sciences – Law and Legal Theory in European Context will gain a higher qualification in the specific legal subject and deepen his or her knowledge by using practical experience to create its theoretical basis.

Application deadline*: April 30

Annual tuition fee:** EUR 600

Duration of study: 4 years

Form of study: full-time or combined

Entrance examination:

Regular date*: June 8, 2021

Alternative date*: June 22, 2021

Form of the exam: oral

Requirements for successful completion of the programme:

Passing of five exams (one foreign language, Introduction to Law in Central European Perspective, Ph.D. Seminar – Law and Legal Theory in European Context, Academic Writing, State Doctoral Examination) and writing of the doctoral thesis and its successful defence.

Organisation and requirements of the entrance examination:

The maximum total score to reach during the entrance examination is 60 points.

The overall number of points achieved by an applicant is composed of the number of points reached within individual parts of the entrance examination. The range of points in individual parts of the entrance examination is as follows:

- Debate over the presented project of a dissertation (0–30 points).
- Bonus points awarded for an applicant's understanding of the content of study regarding (a) his or her plan to be involved in scientific projects and research of the expected training unit (e.g. academic department), and in international research cooperation; (b) linking his or her dissertation topic and outline with the research profile of his or

her doctoral student training unit; (c) consent of a selected supervisor to supervise the applicant's project of the intended dissertation (0–10 points).

- Assessment of the recent academic and research activities of an applicant (0–10 points).
- Proving the knowledge resulting from studying relevant scientific literature and the academic knowledge within the scope of the final state examination in the respective subject field taken during the Master's programme of study. An applicant for study in the English language should show his or her knowledge of the respective literature and the knowledge relevant for a wider context of his or her dissertation project (0–10 points).

The minimum overall number of points for an applicant to attain at the entrance examination in order to be admitted to study is 40 points.

Application Particulars

Elements of application – electronic format

The application, including all required documents to be attached to it, must be sent through the electronic Student Information System by April 30, 2021. After the application has been electronically filled out, it is necessary to send it out by clicking the “send” button, otherwise, the application is not submitted and as such becomes invalid. The requisite documents which constitute a component part of an electronic application are as follows:

- outline of the dissertation project in the extent of 5–7 text pages
- structured CV
- overview of past professional activities (e.g. works published, practical trainings and internships, etc.)

The applicant is obliged to choose from a list of supervisors for a given field and programme a potential supervisor and indicate the choice in the application. The list of supervisors for individual programmes and fields of study is available on the website of the Faculty.

If an applicant graduated from a university or similar higher education institution abroad, one of the following documents must be delivered to the Faculty by surface postal services:

- document certifying the general recognition in the Czech Republic of the foreign university education; such document should have been obtained under ss. 89 and 90 of the Higher Education Act (so-called “recognition”)
- document proving the study at, and graduation from a foreign university where such study and graduation is regarded in the Czech Republic as equal without any further administrative procedure in compliance with international obligations of the Czech Republic (a university diploma and supplement issued in the Slovak Republic, Poland, Hungary or Slovenia) or
- foreign document proving the study at, and graduation from a foreign university, which will be considered and recognised by the Faculty itself (for the recognition fee of CZK 810)

Detailed information regarding the proving of the regular completion of study in the Master's programme for graduates of foreign universities is available on the webpage of the Faculty, section “Prospective Applicants”, subsection “Recognition of Foreign Education”.

Elements of application – paper format

In the case of a paper format of an application, the above-listed appendices, along with the authenticated copy of a university diploma and its supplement are to be submitted in the paper format along with the paper application to the following address:

Univerzita Karlova, Právnická fakulta, Referát doktorského studia

Nám. Curieových 7, 116 40, Prague 1, Czech Republic

Application fee

The submission fee is CZK 720 in the case of an electronic application and acts related to the admissions procedure, and CZK 770 for the paper format of an application and acts related to the admissions procedure, to be paid in compliance with conditions set out in Dean's Measure No. 11/2020.

Period for verifying the fulfilment of the requirements for admission

The deadline for verifying the fulfilment of the requirements for admission for applicants who are to pass their final state examination and complete their Master's programme of study at the Faculty in Autumn 2021, as well as for applicants whose submitted application for recognition of foreign education will not have been decided by September 30, 2021, is October 22, 2021. The same deadline is set for applicants who will have completed their Master's programme of study between September 1–30, 2021, including cases where the required education is to be substantiated under section 48 (3) of the Higher Education Act.

Faculty of Arts

Charles University, Faculty of Arts

The Faculty of Arts of Charles University was established as one of the original four faculties of the University. It can be said that its history is, in a sense, the history of the university as a whole. Since being given its independence at the beginning of the last century, the Faculty of Arts has focused on its principal concerns – the humanities. Today the Faculty is one of the largest faculties at Charles University.

Ph.D. Programmes offered in English and other foreign languages:

- Anglophone Literatures and Cultures
- Asian History and Culture
- Auxiliary Historical Sciences
- Classical Philology
- Clinical and Health Psychology
- Education
- Egyptology
- Ethnology and Cultural Anthropology
- General Linguistics
- Germanoslavistika (Russian)
- Germanoslawistik (German)
- Germanic and Nordic Languages and Literatures
- History / General History
- Ibero-American Studies
- Logic
- Medieval and Neo-Latin Studies
- Musicology
- Migration and Modernity: Historical and Cultural Challenges – European Joint Doctorate MOVES
- Phonetics
- Philosophy
- Political Science
- Romance Languages
- Romance Literatures
- Slavic Philology (in Russian)
- Social Psychology and Psychology of Work
- Sociology
- Theatre Studies
- Translation Studies

The standard length of doctoral degree programmes is four years, in some programmes (where specified by the specifications relating to the subject) three years. Students follow their individual study plans; they graduate by defending their doctoral dissertation and passing the final state examination, and are awarded the title of “doctor” (Ph.D.).

More details can be found at <https://www.ff.cuni.cz/home/applicants/phd-programmes/> and on the websites of the respective departments and institutes of the Faculty.

Application deadline*: April 30

Annual tuition fee:** CZK 2,000

Doctoral study programmes train highly specialised staff for science and research activities. Particular terms and conditions will be specified in the study agreement between the dean of the faculty and the student before the study programme begins.

Ph.D. Programmes are available as either full-time or combined form of study:

- Analytical Chemistry
- Animal Physiology
- Anthropology and Human Genetics
- Applied Geology
- Biochemistry
- Botany
- Demography
- Developmental and Cell Biology
- Didactics of Chemistry
- Didactics of Geography
- Ecology
- Environmental Science
- Experimental Plant Biology
- General Geography
- Geoinformatics, Cartography and Remote Sensing
- Geology
- Immunology
- Inorganic Chemistry
- Macromolecular Chemistry
- Microbiology
- Modeling of Chemical Properties of Nano- and Biostructures
- Molecular and Cellular Biology, Genetics and Virology
- Organic Chemistry
- Parasitology
- Philosophy and History of Science
- Physical Chemistry
- Physical Geography and Geoecology
- Regional and Political Geography
- Social Geography and Regional Development
- Theoretical and Evolutional Biology
- Zoology

Ph.D. Programmes open from March 2022:

- Botany
- Demography
- Developmental and Cell Biology
- Didactics of Geography
- Ecology
- Environmental Science
- Experimental Plant Biology
- Geoinformatics, Cartography and Remote Sensing
- General Geography
- Immunology
- Macromolecular Chemistry
- Modelling of Chemical Properties on Nano- and Biostructures
- Molecular and Cellular Biology, Genetics and Virology
- Organic Chemistry
- Parasitology
- Physical Geography and Geoecology
- Physical Chemistry
- Regional and Political Geography
- Social Geography and Regional Development
- Zoology

Application deadline*: April 30; December 15 **Annual tuition fee**:** No tuition fee

Mathematics and physics have been taught in Prague since the foundation of Charles University. Today, research in physics, mathematics and computer science at the Faculty of Mathematics and Physics represents a significant proportion of research at Charles University as a whole. To apply for one of our doctoral study programmes you must hold or be working towards a Master's diploma and have the necessary abilities for research. The latter consists mainly of the knowledge of the chosen field, English language, and the ability of independent creative work as well as teamwork. The assessment of these abilities is based on the documents submitted with your application and on the entrance examination if the latter is not waived. The entrance examination has two parts: examination in the expertise in the field and examination in the English language.

Ph.D. Programmes are available as either full-time or combined form of study:

Mathematics

- Algebra, Number Theory, and Mathematical Logic
- Computational Mathematics
- General Questions of Mathematics and Computer Science
- Geometry, Topology, and Global Analysis
- Mathematical Analysis
- Probability and Statistics, Econometrics and Financial Mathematics

Computer Science

- Computational Linguistics
- Computer Science – Software Systems
- Computer Science – Theory of Computing, Discrete Models and Optimization
- Computer Science – Visual Computing and Computer Games
- Theoretical Computer Science and Artificial Intelligence

Physics

- Atmospheric Physics, Meteorology and Climatology
- Biophysics, Chemical and Macromolecular Physics
- Mathematical and Computer Modeling
- Particle and Nuclear Physics
- Physics Education and General Problems of Physics
- Physics of Condensed Matter and Materials Research
- Physics of Nanostructures and Nanomaterials
- Physics of Plasmas and Ionized Media
- Physics of Surfaces and Interfaces
- Physics of the Earth and Planets
- Quantum Optics and Optoelectronics
- Theoretical Physics, Astronomy and Astrophysics

Please note that all prospective students need to contact the board for their particular field of study first in order to find their Ph.D. supervisor. Information about programmes, contact persons and detailed admission requirements are available on the faculty website.

Application deadline*: April 30; December 15 **Annual tuition fee**:** No tuition fee

Characteristics of studies

Doctoral studies are spread over a 4-year period and are intended for candidates who have properly completed their Master's degree programme. Studies are available in two forms – full-time and combined. The full-time study assumes the learner involvement of a student in the activities of the department providing the study programme. Activities consist of research or teaching activities according to the nature of the department. The combined study assumes contact with the student's workplace on a purely educational basis. The doctoral programme envisages independent research and creative activity. The artistic-pedagogical branches are aimed at independent theoretical and creative activity. The studies are provided in English (except for Deutsche Sprache und Literatur mit Didaktik which is provided in the German language) and therefore conditional on sufficient knowledge of the English language to enable the candidate to perform the aforementioned activities, including taking exams and writing a dissertation.

Entrance exam: The exam takes the form of a debate about the project research. Candidates present their own ideas and thorough knowledge of the research field. Any additional requirements in particular branches are mentioned in information about those branches.

Research project: The expected length of the text is ten pages. Projects should include in particular: motivation of the applicant to research the topic in question, the state of the research in their chosen field, the results of the candidate's own activities in their chosen field, aims, hypotheses, methods, anticipated results, bibliography, design of individual stages of dissertation with respect to the length of study.

Ph.D. Programmes offered in English and German (4 years):

- **Deutsche Sprache und Literatur mit Didaktik (German)**
- **Didactics of Art Education**
- **Didactics of Chemistry**
- **English Language and Literature in a Didactic Perspective**
- **Education**
- **Educational and School Psychology**
- **Mathematics Education**
- **Musical Theory and Education**
- **Philosophy of Education**
- **Public History**
- **Special Education**

Applicants should submit the following documents:

- application form
- professional curriculum vitae
- list of publications by the applicant
- officially verified certification of Master's degree
- proposal for a research project

Application deadline*: April 30 **Annual tuition fee**:** No tuition fee

Faculty of Social Sciences

Ph.D. Programme in Economics and Finance

Charles University, Faculty of Social Sciences, Institute of Economic Studies
Opletalova 26, 110 00, Prague 1, Czech Republic

 +420 222 112 276  PhD@fsv.cuni.cz
 <https://ies.fsv.cuni.cz/en/node/186>
 Contact person: Ms. Lenka Šlegerová
 Student Services Office: Ms. Kateřina Vovsová  katerina.vovsova@fsv.cuni.cz

The programme concentrates on economic theory and its applications in economic and financial analyses. It focuses on the modelling and analyses of economic processes and the behaviour of economic agents, using modern microeconomics, macroeconomics, econometrics, econometrics and finance. The doctoral programme aims to prepare highly qualified and trained experts for academia, international organisations, the financial sector as well as for the other industries.

Ph.D. Programme in Political Science

Charles University, Faculty of Social Sciences, Institute of Political Studies
Pekařská 16, 158 00, Prague 5, Czech Republic

 +420 222 112 276  cds-ips@fsv.cuni.cz
 <https://ips.fsv.cuni.cz/IPSENG-221.html>
 Student Services Office: Ms. Kateřina Vovsová  katerina.vovsova@fsv.cuni.cz

The study programme is primarily designated for the graduates with a Master's degree in Political Science or any other field of Social Sciences who intend to deepen their knowledge in Political Science, focusing on the issue of democratic and nondemocratic forms of government (changes in political systems, with a special emphasis on development trends connected with modernisation and democratisation, other issues of comparative analysis, including national and regional identities, or the analysis of individual elements of political systems).

Ph.D. Programme in International Relations

Charles University, Faculty of Social Sciences, Institute of Political Studies
Pekařská 16, 158 00, Prague 5, Czech Republic

 +420 222 112 276  cds-ips@fsv.cuni.cz
 <http://ips.fsv.cuni.cz/IPSENG-222.html>
 Student Services Office: Ms. Kateřina Vovsová  katerina.vovsova@fsv.cuni.cz

Graduates of the doctoral programme of International Relations are well-equipped to find work as highly qualified experts in academia, i.e. in research institutions, universities, as well as think-tanks. Their qualification allows them to apply their skills in managerial positions in government agencies, the administration of international organisations, international NGOs and a whole spectrum of private-sector institutions.

Ph.D. Programme in Sociology

Charles University Faculty of Social Sciences, Institute of Sociological Studies
Pekařská 16, 150 00, Prague 5, Czech Republic

+420 222 112 237

<https://fsv.cuni.cz/en/admissions/phd-programmes/sociology>

Department of Sociology: Ms. Jana Vojanová

jana.vojanova@fsv.cuni.cz

Student Services Office: Ms. Denisa Šmejkalová

denisa.smejkalova@fsv.cuni.cz

The Ph.D. Programme in Sociology is realised in collaboration with the Institute of Sociology as well as the Academy of Sciences of the Czech Republic and is focused on scientific inquiry, independent creative work, and deepening of theoretical knowledge. The programme prepares the students for a scientific career and teaching in the field of academic as well as applied research. The graduates can work at universities, research institutions, private companies, and other areas where a high level of theoretical and methodological education in sociology and social research is required.

Ph.D. Programme in Public and Social Policy

Charles University, Faculty of Social Sciences, Institute of Sociological Studies
U Kříže 8, 150 00, Prague 5, Czech Republic

+420 222 112 237

<https://fsv.cuni.cz/en/admissions/phd-programmes/public-and-social-policy>

Department of Public and Social Policy: Ms. Olga Angelovská

olga.angelovska@fsv.cuni.cz

Student Services Office: Ms. Denisa Šmejkalová

denisa.smejkalova@fsv.cuni.cz

The programme prepares students for basic and applied research and teaching in academia as well as other types of activities requiring a high level of theoretical and methodological education in PSP. Graduates are prepared to teach public and social policy at all levels as well as to pursue qualified research work. Relevant jobs are available, above all, at colleges in the Czech Republic and abroad. Further options include qualified policy analysis and policy design in diverse fields (family, education, etc.) as analysts or advisers; work in politics, public administration, or the civic sector.

Ph.D. Programme in Area Studies

Charles University, Faculty of Social Sciences, Institute of International Studies
Pekařská 10, 158 00, Prague 5, Czech Republic

cds.iksz@fsv.cuni.cz

Student Services Office: Ms. Kateřina Vovsová

katerina.vovsova@fsv.cuni.cz

The graduate of the doctoral programme of Media and Communication Studies knows the methods of analysis of media production, media products, and content, audience, and users. The graduate is an expert on the issues of the history and present media and their position in changes in the social, political and cultural context. S/he is able to synthesize knowledge in the social sciences and humanities and to interpret current trends in media development and media and strategic communication.

Doctoral graduates are prepared for academic careers at universities in the Czech Republic and abroad, and for employment as media analysts in applied research. As social scientists, they can work in institutes of the Academy of Sciences of the Czech Republic or other scientific workplaces. They can also act as analysts of communication processes in the political or commercial sphere.

Application deadline*: April 30 **Annual tuition fee**:** EUR 500

Faculty of Physical Education and Sport

Postgraduate doctoral studies are academic/scientific in character and can be pursued in the accredited fields of kinanthropology and biomechanics.

Please note that all prospective students must contact the board for their particular field of study first in order to find their Ph.D. supervisor. A list of programmes and contact persons is available on the faculty website.

Ph.D. Programme available as either full-time or combined form of study:

- **Kinanthropology (4 years)**

Kinanthropology

The study programme is realised within the framework of the kinanthropology field of science. Kinanthropology is a multidisciplinary field of science that deals with the complex effects of intentional and spontaneous physical activity on human personality development in the bio-psycho-social context and in conditions of physical education and sports, physiotherapy, physical health education including their effective management.

The aim of doctoral studies in kinanthropology is the scientific preparation of experts to ensure their ability to participate in independent research, scientific and pedagogical activities and to apply the acquired knowledge and skills in accordance with the needs of practice. It is an interdisciplinary study programme that requires the variability of approach to task-solving reflecting the entire thematic spread of this scientific discipline. During the study, a systematic approach is used and the emphasis is laid on the specificity of kinanthropology, both in terms of methodology and content. Doctoral studies in the kinanthropology programme are highly individualised, based on the type of the dissertation thesis project and also on the field of undergraduate studies. The preparation programme is selected to develop the student's theoretical and methodological readiness in relation to his/her dissertation specialisation with the aim of systematic scientific activity in the chosen research problem.

Application deadline*: April 30 **Annual tuition fee**:** No tuition fee

Faculty of Humanities

Charles University, Faculty of Humanities

Pátkova 2137/5, 182 00, Praha 8 – Libeň, Czech Republic

+420 224 271 430

<https://fhs.cuni.cz/FHSENG-528.html>

Contact person: Ing. Jana Jeníčková, PhD.

phd@fhs.cuni.cz; jana.jenickova@fhs.cuni.cz

The Faculty of Humanities (FHS) is Charles University's youngest faculty. Originally founded in the early 1990s as the Institute for Liberal Education, it was elevated to the rank of a faculty in 2000, the vision is that it would offer study programmes at the Bachelor's, Master's and Ph.D. levels in various humanities and social science disciplines not yet established at CU. The FHS quickly gained a reputation as a progressive school with innovative study programmes and teaching methods. Approximately 3,000 students study within the Faculty. Both in education and research, FHS focuses on a wide range of human sciences. As part of Charles University, it enhances interdisciplinary dialogue between philosophy, social sciences, and humanities on the one side and natural and medical sciences on the other. The Faculty is involved in a range of research and education projects which enjoy international participation.

Ph.D. Programmes in English (4 years):

- Applied Ethics
- General Anthropology
- Historical Sociology
- Longevity Studies
- Semiotics and Philosophy of Communication
- Social Ecology

Ph.D. Programme in French:

- Philosophie allemande et française (3 années)

Ph.D. Programmes in German:

- Deutsche und französische Philosophie (3 Jahre)
- Europäische Kulturzeitgeschichte (4 Jahre)

Application deadline*: April 30 **Annual tuition fee**:** EUR 500

Applied Ethics

Study of Applied Ethics is about systematic training in critical reflection on own and others attitudes, in recognition of hidden assumptions and prejudices and overlooked ethical issues. The aim of these studies is therefore an effort to create a space for systematic scientific work that focuses on the ethical dimension of various disciplines or professions. During the studies the adepts have to manage also the methods of scientific work and its professional presentation.

Further information: <https://fhs.cuni.cz/FHSENG-714.html>

General Anthropology

The broadly conceived doctoral study programme of (general) anthropology focuses on human behaviour, action and cognition both in their biological (genetic) aspects

and evolutionary, social and/or environmentally conditioned variability. Its general anthropological approach stems from an assumption that (a) it is only a variety and variability of behaviour, action and cognition that can speak of the character of human existence, and that (b) it is necessary to speak of this existence by way of a synthesising combination of biological-empirical, cultural-interpretative and reflexively philosophical methods. It is supported by the (Anglo-American) conception of integral general anthropology as a discipline studying both biological and socio-cultural aspects of human beings conceived as complex organisms endowed with language, thought and culture (endowed with a capacity of semiotic, symbolical representation). This assumption is broadened by certain aspects of (German and French) philosophical and historical anthropology. Such conception of (general) anthropology takes into account both the diversity of human cultures and common characteristic features of humanity (both partial evolutionary processes and general qualities of biological and cultural evolution of man). Doctoral students choose one of the four specialisations of this study programme: a) philosophical anthropology, b) historical anthropology, c) psychological anthropology and human ethology, or d) social and cultural anthropology.

Further information: <https://fhs.cuni.cz/FHSENG-718.html>

Historical Sociology

The programme focuses on the problematics of long-term social processes and trends which have a significant impact on the life of contemporary societies. Among the key themes are the questions of modernisation and social change, globalisation tendencies and influences, integration and disintegration processes, continuity and discontinuity relationships, religious and cultural plurality, global and local interconnections, identification of social development's chances and risks, analyses of conflict situations and possibilities of their reconciliation. In the programme framework, thematically colourful and diverse research on the macro-, meso-, and micro-social level is pursued with the basis in historical and sociological methods. A graduate is able to design a research project, gather and evaluate archival or new original empirical data, analyse, interpret and explain them, and offer practical solutions of the investigated problems. It is possible to make a concrete picture of the historical sociology focus by checking out the papers published in the Historical Sociology journal.

Further information: <https://fhs.cuni.cz/FHSENG-719.html>

Longevity Studies

Longevity Studies is an integrated study of humanities, social, health and other applied sciences. It responds to the demand for expertise in issues related to longevity and population ageing, with emphasis on the need for professional and scientific solutions and the use of knowledge in different areas of human activity. The study of the field enables a deeper and wider understanding of the contexts and challenges associated with the prolonging human age in the context of further changes in society and prepares for qualified search for answers and solutions to theoretical and practical questions and ethical contexts. It responds to ongoing demographic changes, not only in terms of population ageing (gerontology), but also to prolonging the lives of people with disabilities and chronic morbidity and other specific groups. The programme is interdisciplinary. It is methodologically based on social sciences, sociology, social and cultural anthropology, and public health, but also uses methods of other disciplines. On the practical and strategic level, it corresponds to the strategy of active and healthy ageing of the UN and WHO. The programme is based on the experience of the Center for Longevity and Long-Term Care CELLO, its international cooperation, such as the Global Longevity Center Global Network (as the only representative of the CEE countries), project solutions, including

major international projects (FRAM, INDUCT, PALLIARE). CELLO follows new trends in modern gerontology, as well as solving issues related to longevity, which are not yet solved in doctoral studies at the university.

Further information: <https://fhs.cuni.cz/FHSENG-720.html>

Semiotics and Philosophy of Communication

Communication is one of the determining manifestations of life of contemporary society. We have become part of communities that are formed in communication processes taking place in reality as well as in digital networks. The study programme Semiotics and Philosophy of Communication focuses on studying communication strategies, their preconditions and their effects. The peculiarity of this programme will appear in connection with the emphasis placed on the study of visual components of communication. This way, we take into account the role that nowadays belongs to images in contemporary communication. It is also important to point out that the analysis of the semiosis, mediation and communication processes is extended to expose the manipulative character of some media discourse procedures which contributes to the specific features of this programme.

Further information: <https://fhs.cuni.cz/FHSENG-723.html>

Social Ecology

The current epoch of Anthropocene requires understanding complex interactions between the socio-economic and biophysical system of our planet, understanding the significance of these relationships and their risks. The study programme is unique because of its multi- and interdisciplinarity: it is based mainly on sociology, economics, environmental science and also on international relations, political science, pedagogy, statistics, informatics and others, and it aims at a stronger interconnection between environmental and social sciences and subjects. Its nature and content, i.e. its approaches to exploration and topics, are close to the newly advancing discipline of “sustainability science”.

Further information: <https://fhs.cuni.cz/FHSENG-717.html>

Philosophie allemande et française

Ces études doctorales de troisième cycle sont ouvertes sous la forme interne et externe. La filière « philosophie allemande et française » s'oriente sur la philosophie classique allemande (à partir de Kant), la réaction à celle-ci, puis la phénoménologie (tout particulièrement celle de Husserl) ainsi que sa réception et son développement en France, de la philosophie de la vie et de l'existence, de l'herméneutique, de l'ontologie phénoménologique, jusqu'aux modifications actuelles de la phénoménologie et aux derniers développements de la philosophie française w. Elle permet l'étude de leurs conditions historiques et de leurs influences mutuelles dans l'espace intellectuel et culturel européen. Cette filière propose ainsi une préparation exigeante et professionnelle à la recherche et au déploiement des approches philosophiques actuelles qui se sont formées en Europe centrale et en France et qui influencent fondamentalement les débats sur la scène philosophique internationale. Le programme d'études du doctorant inclut des activités de publication, la participation à des colloques et le passage des examens dans les matières obligatoires et facultatives, au choix selon le manuel d'accréditation. Les études s'achèvent par l'examen doctoral d'État et par la soutenance de la thèse de doctorat, après lesquels l'étudiant obtiendra le titre Ph.D.

Further information: <https://fhs.cuni.cz/FHSENG-722.html>

Deutsche und französische Philosophie

Das PhD Studien-Programm Deutsche und französische Philosophie, spezialisiert auf die deutsche klassische Philosophie, philosophische Anthropologie und gegenwärtige französische Philosophie, ihre gegenseitigen Verhältnisse im intellektuellen und kulturellen

europäischen Raum, bietet anspruchsvolle Basis für die Forschung und selbständige Entfaltung aktueller philosophischer Ansätze an, die sich im Mitteleuropa und französisch sprechenden Ländern profiliert haben und die sowohl auf die gegenwärtige Szene im westlichen Ausmass im Allgemeinen, als auch insbesondere auf die gegenwärtige tschechische Philosophie grundsätzlichen Einfluss haben.

Further information: <https://fhs.cuni.cz/FHSENG-716.html>

Europäische Kulturzeitgeschichte

Der Lehrplan der europäischen Zeitgeschichte ist der einzige historische Bereich in der Tschechischen Republik, der das Thema Kulturgeschichte auf europäischer Ebene zum Ausdruck bringt. Es geht nicht nur um ein enges Gespür für Kulturgeschichte, denn die kulturelle Komponente wird heute als wesentlicher Aspekt in vielen anderen Bereichen der Geschichtsschreibung wahrgenommen: zum Beispiel die Rolle des kulturellen Diskurses in der politischen Geschichte, die Frage der politischen Auseinandersetzung mit der kulturellen Dominanz oder im Gegenteil der Autonomie. Die tschechische Gesellschaft hat im europäischen Vergleich große Wissensdefizite und eine Anpassung an das Wissen ihrer Zeitgeschichte. Das Studienprogramm für europäische Zeitgeschichte will somit dazu beitragen, die europäischen Akzente "staatsgeschichtliche Bildung" zu stärken. Das Programm ist so konzipiert, dass der Absolvent für unabhängige Forschungsarbeiten in diesem Bereich bereit ist und in der akademischen Welt professionell arbeiten kann. Die "Europäität" der Akkreditierung wird durch die Betonung der Sprachkompetenz der Bewerber unterstrichen, und der Lehrplan beinhaltet die Verpflichtung, im Ausland zu studieren.

Ph.D. Programme in Economics (4–6 years)

The Center for Economic Research and Graduate Education – Economics Institute (CERGE-EI) offers a Ph.D. programme of doctoral studies in theoretical and applied economics. The CERGE-EI Ph.D. in Economics programme is intended for outstanding students who desire rigorous graduate education in economics at a modern, international institution with the goal of pursuing an academic career or entering a high-level position in an international organisation, central bank, government ministry or the private sector. The Social Science Research Network (SSRN) ranks CERGE-EI in the top 2 per cent of more than 1,500 research institutions worldwide. Research Papers in Economics (RePEc) ranks CERGE-EI in the top 5 per cent of economic departments/research institutions worldwide.

The Ph.D. programme consists of two years of coursework (Microeconomics, Macroeconomics, Statistics/Econometrics, Academic Writing + specific elective courses), typically followed by two years of supervised dissertation research. The working language of the institution is English. CERGE-EI encourages its students to conduct part of their dissertation research at partner institutions in Western Europe and North America, as well as to participate in collaborative research projects in other countries.

Further information: <https://www.cerge-ei.cz/phd-admissions/program-details>

Eligibility for Study

Students are expected to have a good background in advanced mathematics, as well as sufficient English language skills to understand the study material fully. Undergraduate training in economics is welcomed, though not essential. Applicants are required to hold a Master's degree (or equivalent) or expected to complete their Master's studies by September 2021.

How to Apply

Students should submit the online application form and upload a CV, motivation letter, proof of English proficiency and verified copies of diplomas and transcripts. Two letters of recommendation are required.

For a complete list of application materials, please visit the Institute's website at <https://www.cerge-ei.cz/phd-admissions/how-to-apply>

Documents are evaluated by the Admissions Committee of CERGE-EI. Applicants may be directly admitted or invited to the summer Preparatory Semester to receive intensive training in intermediate Microeconomics, Macroeconomics, and Mathematics. The Ph.D. programme begins in October every year. Approximately 30 students are usually offered admission to the Ph.D. programme each year.

Application deadline*: March 31

Annual tuition fee:** Students admitted and enrolled in the Ph.D. in Economics programme **do not pay any tuition.**
